

CREMONINI CLAY

The most famous red clay in tennis, used in thousands of tennis courts around the world.

OUR HISTORY

Founded in 1973 and based in Imola, Italy, Cremonini is still family-owned by brothers Cristina and Fillipo Cremonini, who continue their parents' legacy of producing the finest red clay sporting surfaces in the world.

With 50 years of experience in the production of red clay for sports facilities, Cremonini has managed to establish itself as the number one manufacturer in the field, making its products widely known throughout the world.

MADE IN ITALY.

Founded in 1973 and based in Imola, Italy, Cremonini is still family-owned and continues to produce the finest red clay sporting surfaces in the world.

*Subject to site inspection.

**Although courts can be played on immediately, we do recommend that you close the court for 48-72 hours to enable the clay to settle in

***Provided the surface is watered in hot and windy conditions, the clay will stay moist longer than en tout cas. In heavy rains, it is possible that small quantities of the clay top layer can wash away.
